Rock Knowledge and Energies

Trance Channelling begins

■ Simply feel my energies.

■ What I was holding now was some kind of energy. What I was being told that it is the Rock of knowledge. I asked what does this mean? I couldn't even speak. And I was told to just hold those energies, so that you could experience them. Now I am in link. These are the energies of the rock that held the sword Excalibur. These are the energies that comprise the stones that built Stonehenge. These are the energies of the first rock that was carved circular to become the first wheel. These are the energies of the rock upon which the Commandments were inscribed. These are the energies of the rock that formed the crystalline chip, to be within the first computer. Rock knowledge.

I am been given to understand that a lot of energy for the development of the human race, was actually given through rocks. We all know about the existence of solar energies, rays, Mother Earth energies etc, etc. We very rarely give any credence to rock energies. And it is time we acknowledge those strange pieces of black, unspectacular looking rock. That has added their wisdom to help us grow.

Sometimes when you have the chance, meditate either holding a rock in your hand, or sitting directly on an exposed rock. You will then begin to understand the link. You will initially feel the rock to be a dense, cool surfaced mineral, but as you go within it. You will find a vibrancy that you never knew existed: warmth and a sheer vibrancy: actual vibrations.

I am now getting stream after stream of codes that are actually embedded in rocks. The codes are so superior, that they would not be able to be deciphered by us. These are more advanced than any computer language in existence today. One day if we are able to tap into the knowledge that is contained in these rocks. We will find answers to inter stellar travel. Cures to diseases we never knew; the ability to tap into the knowledge of the Universe, beyond our comprehension: All within a single rock.

Greetings from one who has no name: but is crystalline. Our (....) are so unified in the whole, that we only see us as one. Therefore there is no separate name for each part of us that comprises the whole. If you were able to see us, and our level of vibration is beyond our capacity. You would see us as a beautiful shiny mountain of crystal. And yet each section would be separate, and yet one. We vibrate at one frequency. Unlike you whose vibrations changes from moment to moment- Depending upon your mood; ours never vary.

We are also part of what you term Ashtaar. Our mission in your planet is 2 fold. We are here to learn from your few will experience and to learn from your energy signatures- that is our learning. And in turn, we are here to bath you in the vibrancy of our crystal light. And to charge any individuals who have chosen to change their vibratory pattern. This happens on a unconscious level. But occasionally we have to step into the physical, when there is a small blockage.

To Dpk: we have come for you. You have called upon us to raise your crystalline levels to another frequency and vibrations. You have called upon us unconsciously. Do you now accept us consciously?

Dpk: *Yes sir.*

We now thank you, as we would not be able to work if you conscious was in disagreement.

The energy works on Dpk's head and crown and temples.

Speak out what images you are receiving now.

Dpk: *A child. I am seeing a child running across a garden.*

Where are you?

Dpk: *A child.*

Look at that child.

Dpk: *It holds my hand. It is taking me across the garden.*

My dear one. Your inner child is unlike any one else's on this planet. Your inner child will constantly change its form. You will see it of this Earth and of other species as well. Have no fear. Speak. Speak to your child. He needs your attention. He has been in so many forms. He knows so many shapes, dimensions and planets. He is afraid of your earthly limitations. Assure him and love him. So that he may radiate his light and be the true multi planetary being that he is. It is time to link with him and unleash his power. You will be guided. Do you have any questions? My energies are with you.

['Nis', 'Ang' and 'Raj' were asked to sit in a triangle, in the middle.]

Go within please and re-establish the energy connection that the 3 of you had earlier, without holding hands. Just allow the energies to emanate from 'Nis', to 'Raj', to 'Ang' and back. And create that vibrant grid, going faster and faster. I will then guide you. Raise your vibrations. Connect with cosmic energy. Child (to 'Nis') you will receive an image. Allow it to slowly manifest and describe it.

Nis: I think it is the God Force. It is a huge expanse of energy which is moving and pulsing and emanating.

Now examine it from a scientific point of view. Now describe it.

Nis: Gases of different vibrations which emit different colors, different frequencies. Simultaneously existing and creating.

What is the purpose of this?

Nis: To allow us to tap into what is required for us to us. Unfortunately we don't tap into it as a whole. It is every part that is required now, or in the past or in the future.

How could the human being tap into this?

Nis: By asking to go up to the Source by the various stages of the higher selves that are there. Keep soaring and going higher and higher and higher. And when you feel you have reached the God Source, even then go higher. That's where it is. In the beyond.

What would this do if a human being was capable of reaching it?

Nis: I think human beings are capable of reaching it. I would I think bring parts of all that you are. That existed every where to a whole. It would make you more into unity.

Well done.

To Ang: My dear one have you reached any images?

Ang: As I went up higher and higher I became one with the Universe.: One with all the Universes and beyond: One with the cosmos and beyond: One with all the various energies that are up there: They are all one. I saw vibrant colours inter mingling with each other. The planets, the stars. millions of galaxies: All existing as one- The past present, future all one.

You are blessed.

To Raj: my dear child, go within your physical body.

Raj: It has opened up pathways within me. I see all the universes, and galaxies and stars within me: Existing simultaneously within me. It shows me there is no past, present, future. Everything is NOW. I feel hollow inside with all the universes residing within me.

You are blessed. Continue to hold this energy source while others work around you. Jim, Dhiren and Cyrus were asked to link up to the collective energies in the center.

You may describe in any terms. Link now.

Whoever wishes to speak may do so.

Cyr: I see a great shaft of light, like a spiral- Moving at a tremendous speed. Inaudible.

I am going with astronomical speed. There is a tremendous force- A tremendous push.

■ Do not resist. Go with the flow.

Cyr: I cannot resist because it is over powering. I am in the flow of it completely. I am way beyond the beyond.

■ You are blessed. Stay WITH THE ENERGIES AS LONG AS YOU WISH. These will serve you well.

Dhr: I saw a vortex with very brilliant colours. It resembled a tornado. Then it turned 180% and the words stairway to Ascension came to me.

■ You are blessed.

Jm: The energies that connect all. (.....)

■ Son connect with the brain pattern of any of the 3 and describe them. Preferably in scientific terms.

Jm:transmitters and connectors of energy.

■ Thank you. Your session will now end as your energy levels have now reached critical mass. A discussion will now take place in the room.

The trance was broken.

Cyr: I saw in these three a tremendous expansion
