THE MAHATMA GANDHI
THE RAMSES
Channelled by Sohrab

Mahatma Gandhi

Music

Trance Channelling begins..

I am the energies of the one you call Mahatma Gandhi. Don't think of me as the human that your country knows. I am very different energies now. I only give you this name as a reference point for your understanding. I come to help you understand how cosmic energy is used at every step of growth: for people, nations, and countries.

The time period of Indian Independence was a very vital point of celestial ascension for this area of planet Earth. This does not mean that the act of independence was essential for this development but the act of independence allowed the physical structure of the humans, in this country, to collectively bond, access cosmic energies as they existed at that time period and open portals in this part of planet Earth So yes, the actual movement of independence was important, but in a cosmic framework.

I, completely unconsciously, was a powerhouse of cosmic energies. It is my energies, dear friend (Khur) that you used in your ashram to study further developments in energy planning. There were a few of us, at that time period who completely unconsciously carried the appropriate jigsaw puzzle of cosmic energies that were required to uplift this part of the world.

The one you call Nehru, the one you call Sarojini Naidu, the one you call Mountbatten all played a very vital role in this cosmic upliftment. We were the 4 key elements, unknowing to ourselves, who joined together and formed the central nucleus of the energies, which was then supported by many others around, forming a new cosmic network, which spread its energies throughout your country, causing huge shakeups of energy.

Yes, at this very instant, I can sense many people who have different viewpoints about the independence movement, the methodology and the reasons behind it. Release all of these; they are unimportant for today's discussion. What is important is that you understand how a political event affects cosmic energy and cosmic energy is affected by a political event. Any war, any battle, any coup, any change of government policy, any change in the emotional content of a group of people can cause cosmic fluctuations. You may ask questions, if you wish.

GI: How do we use this cosmic energy, now, in today's time, for our country?

The Mahatma: A very good question! Let us explain this by talking about 1947 (in this timeline) vs. 2006. In 1947, around the world, there were certain elements of cosmic energies that were being introduced to the existent old energies, which now no longer have any meaning to this wonderful group. Those cosmic energies shattered old energies and brought about a flowering of new cosmic energies throughout the globe. At that time, in particular, they were used unconsciously by many, such as me, who were carriers of these energies but had chosen to pull down upon ourselves the veil of forgetfulness so strongly that we had no conscious knowledge whatsoever of being these 'energy powerhouses'. Do you understand why we could not? BECAUSE WE WOULD HAVE MISUSED THESE ENERGIES. There is no human alive, there was no human alive at that time, who could have worked consciously with the cosmic energies, without inflating his or her ego and going awry and I would have been a prime example of this, if I had known my own strength.

Now the level of beautiful evolution around the globe has risen with the emergence of magnificent souls such as yourselves and other groups that exist around the world. Yes, there are only a few, like this group, who hold this level of power. I say this not to flatter but to help you understand how unique you are and what responsibility you hold. There are groups, like this one, who are now given conscious knowledge of this level of power and you are being taught to work, energetically, with this power for the world, for groups of people and for yourselves.

You ask me how. You have been learning how, all this time. Every exercise you have been given, every task that has been set, every duty that has been outlined to you, every indication of future work that you individually will be doing are examples of how you will consciously wield this energy. My only reason for coming here today is to help you understand how, from 4 individuals with no consciousness, cosmic energy was re-structured within this entire region and that too, without our consciousness. Now imagine what 12, 20, 100 of you can do consciously. If you joined together in complete and total belief, your group, together, could change anything, in an instant. But one weak link would drop the energy; one moment of doubt, one thought of being insignificant, one fleeting glimpse of your own frailty and down would come the collective one.

Perhaps it was an advantage to us that we did not know we wielded this power. You do not have that luxury but you have the joy of knowing the level of power that you, yourselves, wield. Rejoice in this. And stop condemning me for what I did. I acted, many times, out of ignorance, many times out of ego. It was also my growth process. As an individual soul that had 2 joint focii, I had to work upon my own personal issues of ego, arrogance, self-esteem and simultaneously I had to work upon the growth of a nation. It was a might task and I often failed.

Dar: May I ask a question? As Mohandas Karamchand Gandhi, you accepted the partition.

The Mahatma: I never did.

Dar: This is what history has told us. I would like to know, with the power you had, why you could not stop it. The most heartrending, heart wrenching, painful thing that took place.

The Mahatma: It was not with my permission It was not my desire but my ego, my own arrogance, my own self-esteem came in the way. I DO KNOW, by then, the power I had and I chose not to use it. I sacrificed all for myself I made heinous mistakes.

Dar: But sir, we too, as human beings, must be taught not to get ego involved in this power. It is important that you teach us this because it is very easy to slide in this.

The Mahatma: I have forfeited the right to teach you that. I DO not give myself that permission. I do not have that right; your Masters have that right. It is a lesson I am still learning; it still affects me, in spirit form.

Dar: In spirit, ego comes in?

The Mahatma: Let us say, in spirit, my ego still comes in

Zar: Gandhiji. Your ego doesn't come in. You did your best to save this partition from happening. You pleaded with Nehru and Jinnali It was their ego. You were disappointed. You cried in your heart. You didn't want to see the country divide but they had such egos, they didn't give in. You died as an old unhappy man. You knew you had the power to stop it and you could not There would have been more bloodshed, had you tried to stop it.

The Mahatma: I thank you for your kindness and your belief in me but I cannot accept it. I cannot accept it. I had the power, by then, and the knowledge of my power to change history, without bloodshed.

Zar: But you were not happy.

The Mahatma: Because there was a war within me, always at that point, my human side sacrificed all for my own self, which was not something I had done before. It was, to me, the worst crime that I could have committed.

Zar: Your goal was something; independence.

The Mahatma: And I allowed my focus, my one focus to take away my humanity. Nothing is worth losing your humanity, nothing.

Zar: That's why you're the Mahatma.

Dar: In your own way, you've taught us, nothing is worth losing humanity; compassion, charity and love, which is not worth losing.

The Mahatma: It is ironic that I have taught many, posthumously, by my example, when many times I only mouthed words and did not believe in what I was doing. But I did it because my ego demanded I do it. Do not think I am putting myself down. Most of what I did, I did with complete focus and belief in self but many times, I allowed the principle to override my humanity. That is not worth it.

Dar: Humanitarianism, compassion, which is one of the highest energies, that is cosmic energy.

The Mahatma: And that is why you are part of this group.

Nan: As you operate from the principles of the Gita, which was dhanna, how did this interfere with humanity? What is the paradox between the two?

The Mahatma: Just as this group, collectively, with complete faith, trust and belief in one another, in themselves and the universe could, literally and figuratively, move mountains, but simultaneously, with one weak link fail; so was it with me. The war was not between me and those around me; it was between me and myself. That was my greatest war. There were 2 parts within me and I talk about the human side of myself.

When it came to working for the country, for the nation and for what I believed in for the group, I was unswerving but when it came to examining my own humanity, my humility, my own understanding of who I am, who I could be, I failed. There was this paradox within me constantly: focus, dedication, love, firmness waning with ego, self-esteem, the desire to be acknowledged, the desire to be respected, the desire TO BE the white man.

What principles can you base your life on if you fail yourself? It all becomes words then. I preached and I even practiced but not out of humanity, not out of compassion; out of ego, arrogance, pride; pride in the country, as well but pride nonetheless. It is a lesson I am still learning.

Dar: This means that we have a long way to go.

The Mahatma: My dear friend, you and most in your group have gone much further than I have. Do not (I have said this in the beginning), do not look at me as the Gandhi you knew; look at me as an energy being and look at yourself as an energy being. Then you will understand I am not of the evolution each one in this room is. It is my honour to be among you; not your honour to be among me. Once again, I do not put myself down; I speak the truth

Group Member: (..) unity between India and Pakistan, at some point?

The Mahatma: Let me explain this by telling you what I'm involved with, right now. When I finally passed over and underwent the healing sleep, I came out, not a refreshed being, but a soul desiring to learn, to grow, to expand at a very rapid rate. I was permitted, by the Masters, to split myself up, into many parts.

You are all aware of this, so I don't have to explain how you can be many parts. A lot of me remained in the spirit form and yet, many parts of me, many, many parts of me, incarnated on Earth and I chose Earth as my learning ground and I became the oppressor and the oppressed; I became the conqueror and the conquered; I became the sinner and the sinned and each time, I incarnated in this format, I became both parts that interacted with one another: I became the rapist who raped the victim, who was also me; they were not

separate souls, they were parts of me. And I placed myself around the globe, in different time periods, not just one and I am still here, working out this aspect.

From spirit form, I have chosen to understand humanity as a collective group. I am working, constantly, in spirit form, with many, what you would term, political masters; masters who work primarily to help different groups of people understand each other and merge. I have the privilege to be one of these, who are working constantly, not just with this country but with all peoples, around the world, to understand the humanity of one another. And it is a task that is almost hopeless and yet it is, it is happening. So, when you talk about India and Pakistan, I do not see it as 2 countries anymore; I see it as the same energies that cannot intermingle because of their own boundaries that they set and I work upon the energies within the minds of, not only the politicians but also the common man.

I work upon the strands, not altering them, because that would be interfering with their free will, but giving them visual **options**: showing them paths that they have not seen before and then, allowing them to make their own decisions. I will be involved in this task for many, many millennia.

Nan: Was the partition that took place in India's blueprint?

The Mahatma: It was in MY blueprint I had to cause it and for that I must take responsibility. Yes, it was an option in the blueprint of the country but remember that the blueprint of an area or a country is never as specific as it is for individual human beings and knowing to me, my power was so great that I energized my own blueprint choice and affected a nation. I did not do this consciously but it was a choice, in my blueprint, that I took and thereby, empowered it to such a degree that a nation had to follow. So I take responsibility.

GI: Are the other three also taking responsibility for what they created?

The Mahatma: That is their choice; that is not in my purview. I do not even examine it It would be inappropriate. Do not forget, I am not your teaching Master. Your teaching Masters would be permitted to view this and give you the appropriate answer. I am not permitted.

Nan: Are you feeling guilt about all this?

The Mahatma: Just as you have a hangover of past life issues, which are not necessarily in your full consciousness in this lifetime and yet you suffer the effects many a time, so is it with me. As a spirit (and I'm speaking to you now from my part that is spirit form), I am more aware than you are of past issues that I have created and been through and caused and some of that has been worked through, by me, but some of that still vibrates within my spiritual being.

Many of you have the idea that we, in spirit form, pass over and work at an extremely rapid rate and shed ourselves of all emotions and we become these shining, happy beings. And yes, yes, we do but the speed at which we work and the quantity of work that we do differs

from spirit to spirit. Once again, do not judge me. In your time frame, you are looking at a few years. I am still not through all the work I have to do. I have full confidence, within myself, that I will overcome all these issues and will work out what I need to, in spirit form but as yet, I am not there. I have been permitted to come to you to help you understand all this

Dar: May I say that abundance, material, emotional and spiritual, gives unity. How do you see us working towards this unity, which is abundance, vis a vis country, people or whole sphere of the world? That is from where this unity, you are striving for, will come.

The Mahatma: Are you aware that much of your personal, individual abundance comes from my energies? You and I are very connected, dear friend; not as Mahatma Gandhi to you, but as energy being to energy being. Let us explain : each Earth being has a series of, shall we say, role models; some of these role models may be from the political arena, others may be great philanthropists, yet others may be from the arts, sciences, others may be great humanitarians, social worker and each of you has a whole plethora of energy beings whom you internally respect. You may not even be conscious of this.

The instant you put out into the universe this feeling, shall we say, of respect, instantly you are fed with a ray from that person or from his energies. One instant of an appreciative thought of another and the beam from that energy is with you forever. The moment that beam starts to vibrate within your personal collection of beams, it starts to make changes in your physical and your energetic bodies. That, in turn, will now provoke you to find newer, newer role models and as you put out these energies; you are now being flooded with more and higher level role model energies.

This, in turn, has to bring about abundance: financial, emotional, spiritual, mental, physical. Once again, most of you have these beautiful role models and have no idea of who they are. Now be conscious of them. Go back through your lives and think of whom you have affirmed respect, in the past; it may have been a fleeting moment: perhaps in school, you may read in a book of a certain leader and you thought, "Oh, my Goodness! How did he do that?" That was enough to form an energy beam between him and you for life. Each time you have done this, you have added to your own inner strength. Now it is time to cosmically harness this power and be abundant.

Think of me differently now, with a bit of compassion.

Blessings.

Sohrab changes energies to the Ramses

Ramses: The Ramses greets you! Cosmic energies have been channeled through all forms of beings and entities throughout the millennia Do not feel cosmic energy has been discovered in your lifetime! There were beings, such as myself, who were pure cosmic energy conductors. Our prime focus was to disseminate these energies to your planet. We were not concerned with all humankind, animal or plant life. We were only concerned with the

planetary body. Our sole function was to activate and implant the appropriate energies within the structure of your Mother Earth. You, this set, have now evolved to a level where you have the Divine right to also access the energies that other beings, such as myself, wield. This is simply because you have joined energetic forces with Mother Gaia. Your physical structure now contains sufficient strands of her energy, which permits a union between us; that is all. Merge with my energies.

You (Khur) resist. Support her physically. Do you (Nan) wish to shatter blocks?

Nan: Yes.

Ramses works upon Nan 's heart.

You will have a release over the next 24 hours. Permit it. Do not block the release. Do not use medication to avert it.

Ramses works upon Dian 's hand.

Sohrab changes energies

New Energy Being: I am a muse of music. I, too, wield cosmic energy through my notes and melodies. I provoke those who are musically inclined to use and harness cosmic energy, for the good of all around. For those who are musically inclined and do not play an instrument, I provoke them to listen to the appropriate music and with their intent, to transmute that energy into pure cosmic light. Others are urged to sing with my music. For those who wish to speak aloud, their words become my cosmic music. We, too, have evolved. Newer strains have come from above, cosmic strains, and we are even more formless than before and our harmonies and resonances (*Tape side ended*) New forms of cosmic music to be played throughout existence.

Music is anything, *anything* that vibrates and brings joy. Touch is music. Emotional intent is music. Laughter is very powerful music. Thoughts of creation are music. Appreciation of the beauty within is music. Oneness is music Painting is music. Your very existence is music. Be in music all the time.

Do you know that every part of your physical body makes a different music at every instant? Yes! (*pointing to different parts of the body*) This is making a different music to this. This little thing is giving out a completely different music and this has yet another music and this and this and this colour and together, there is so much music pouring out of you and each thought and each look and each glance and each smile and each crease and each giggle has a different music.

GI: It becomes a symphony.

New Energy: She is a walking symphony. And each step becomes music and each movement and each moment and the music never remains the same; even within this piece of clothing,

as you move it through energies, the music changes. It is never the same. And then there is all this music and next to her is this music and that and that and the symphonies become more and more harmonious. Live in cosmic music.

Hundreds of Master Energies have been passed through the vacant chair in the center of the room, throughout the course of this meeting. Focus on the energies within the chair and sit for a few moments in gratitude.

Poon: Laugh with me. Laugh! Laugh! Laugh till you cry. Feel the vibration. Now begin to receive the energies and consciously, in a stream, without hesitation, begin to anchor into Mother Earth, each strand, one by one, in a continuous flow. Allow it to pass through every chakra into Mother Earth. Faster! Use your breath. Faster! Yes!

New Energy: Every morning, or the next 21 days, you will do this for the period that is convenient to you. But it must be done without missing a single day. You will consciously connect to the highest energies. For each one, it will be on a different level. Each one is the channel and each one will work with Mother Earth, in this manner. We thank you for your cooperation. Blessings!

Shemi: Is there a question?

Devi: I-low have we grown since the last cosmic class that we have? Have we been able to use our cosmic powers?

New Energy: You have learnt to use cosmic powers extremely fast. You have imbibed these within you, through the help of our son (Sobrab) here. Your growth is so expanded, each one here. There is more to be done. More will be coming your way. This son of ours here, will place many more cosmic rays within you. You are all ready. Each one of you here is ready to receive, to imbibe, to these powers. Cosmic energy is with you and is you. You do not have to worry about how you use it; we know you will use it well.

Is there anything else?

GI: Is this cosmic energy the same as the golden light, which is in the universe at all times?

New Energy: That is part of the energy. That light **has** been given to your planet for it is worthy to receive it. It is one part of cosmic energy. Be aware of it at all times. Many of you forget all that you are given. Learn, remember, use consciously and constantly all energies that are given to you. This light is of a very high power. Use it consciously, children. It is yours to do as you command.

GI: How is Om progressing and is he in the room now with us?

New Energy: He's here. He is with each one of you. He is a part of you. His strands are with you. He is never far from you. He is there. He is waiting, waiting to be received by you. Call for him. He is you. Reach out to him with open arms; he wails, he waits for your call. Welcome him. He is honoured to be with you wonderful, wonderful souls. Make him

consciously a part of you, not just something you remember sporadically. You and he are one.
