THE GANESH COLLECTIVE
FRIENDS FROM THE UNIVERSE
Channeled by Sohrab

The Ganesh Energies Friends from the Universe Speak to the Group

Trance channeling begins

 The Ganesh festivities have officially ended, and yet the Ganesh festivities within your physical and spirit structure have only just begun.

Most of you are now aware of the essence of the Ganesh energies, as they are at this moment of the now: they facilitate inter-galactic union. This year, they have drawn to planet earth fresh and vibrant energies that have never before been experienced here.

They are being experienced intensively by all in this country, regardless of whether or not the inhabitants have actively participated in the festival. The energies have also been internalized by the rest of Planet Earth, but to a slightly lesser degree.

Now, the 'festivities' within your structure have only just begun: your cells are currently vibrating with these new strands but they have yet merged, as these are being viewed with suspicion and resistance. But an energetic merger is imminent. This will not take place simultaneously for all of humankind: each person's merger will depend on his energetic openness and lack of resistance.

These new Universal energies, when fully assimilated by you, will offer you "Universal Trade and Commerce". Though this sounds humorous, it is magnificent. It means that you will have the opportunity to exchange information and energies with any aspect of the Universe, be it another society or a tract of deep space, for personal growth and evolution.

Those who are consciously aware of this will be able to tap into alternative cultures, lifestyles, belief structures and ideology; and simultaneously offer these cultures a glimpse of your society. You could call this a celestial exchange program.

Those on planet Earth who are not conscious of this will still receive glimpses into aspects alien to self; it will simply broaden their spectrum in a general way, and help them attain more tolerance and awareness.

As lightworkers, you must not only avail of this for self, but also share this information with others, so that they do the same.

The human race has *finally reached critical mass* in this area: more than 50% are now open to the concept of other societies and existences in the Universe: not that they *do* exist, but that they possibly *could* exist!

This period of critical mass was reached during the current Ganesh festivities. (At this point the clock struck loudly, and a flock of birds outside the room started chirping vigorously)

A Group member: – *‘Ang’ just spoke about tones and sounds: there it is!*

 As this critical mass has now been reached, you can expect a new level of acceptance of Universality. Now all the science fiction that people have watched, and the books that they have read, will start to make sense to them.

It is now the duty of the scientists and various governments, who have concrete knowledge of this, to make it known publicly.

Today, we have a few friends from across the Universe, who wish to speak to you briefly. Let us welcome them, one by one.

The first Energy

It is amusing to us to experience, in this lovely group, two distinct sets of energies: the first: and thankfully the majority, who are joyously welcoming; and the second, the rabid skeptics. However, we joyously greet all of you!

Let us introduce ourselves, as it is unlikely that any of you have ever experienced our energies before. We come from a distant part of this galaxy: we are universal friends and well-wishers of Planet Earth, but we have had very little to do with your tract of space before.

We are Universal energy workers, and from time to time, we are drawn away from our own home region to do specific ‘on-site’ work: Planet Earth has made such a call, and we are simply responding to it.

We are beings of pure energy: we do not have any corporeal forms like yours, nor do we have names or a language. Being pure energy, though we do have somewhat individuated forms, we can also flow freely through all.

Our function is to help other societies merge with new energies. (Chuckling) You could compare us to giant water-filters: We allow these new energies to first pass through us, and we 'filter out' the resonances and tonalities that are not conducive to your society. We then permit the distilled energies to be merged into your structures.

What we distill out, we use as 'energetic food' for ourselves. Therefore, through this process, we benefit self, and all the societies that we aid. We welcome your questions today.

Group Member: *It sounds very much like one of the three energies that we learned of, two Thursdays ago, who also are like filters: they take in the energies, process them, and transmute them for earth?*

■ You are quite right; we are not the only Universal friends doing this for planet Earth. She is at a current state of personal evolution where this is key to her growth. It is the call of the moment. Some of us are working with 'filtration and distillation' for her wildlife; others for her topography, some for her vegetation, yet others for her atmosphere, and so on.

Group Member: *When you talk about food, is this because of all the contamination and the poisons that we are putting into our soil, or is it at an energetic level?*

■ We are not qualified to comment on aspects other than those we are working on: filtration of the new Universal energies drawn to the planet. What we are removing are not necessarily 'toxins', but simply those aspects of the energies that are not conducive to your current growth, or those which the planet is not yet ready to receive.

Group Member: *Do you have any colour to your energies? I seem to be seeing several colours as you speak.*

■ You will probably receive several colours as energetic triggers. You have a very limited colour spectrum: you see seven colours and shades thereof. Ours are beyond 144. However, if you receive colours that help you connect with us, use them.

Group Member: *Is the filtration to be done by you on individual or a collective level?*

■ Though we are individuated, we are in full contact with the collective at all times: it is one collective mind with individuated minds within it. Therefore, though we may work individually at times, we are in full sync with the collective.

Group Member: *What name do we call you?*

■ We have no concept of names: even our tonality is beyond your energetic frequency, so you may choose to name us if you wish; it makes no difference.

Group Member: *What consciousness do you come from?*

Earth works with individuated consciousness, then the collective consciousness of the kingdom you inhabit, then the planet's consciousness, and then Universal consciousness...so many layers.

We work with all these, in perfect union. One simply flows into the other. We therefore are able to perceive the needs of the individual and the collective simultaneously, and act accordingly.

When several planetary bodies put out 'distress calls' (as Earth did), we instantly assess where we are most needed, and where it is even appropriate for us to go, to offer our 'filtration' services, and we respond accordingly. If our energies are not the appropriate ones, we then act as 'liaison officers', and connect that planet with another suitable group, who would be of better service to them. So even there, we act as 'filters' for Universal needs.

Group Member: *The call: is it a sound vibration?*

Yes, it is a sound vibration, but of much greater complexity than your perception of sound. To us, sound also includes music, light, energetic awareness, pure consciousness and many other ingredients.

Group Member: *What sound? [barely audible]*

You 'hear' sound; and occasionally you can go beyond that and 'experience' it. Sound, to us, is even beyond experience: it is pure consciousness. We do not 'feel' things the way you do; we do not 'vibrate' the way you do.

Group Member: *Is it awareness?*

It is beyond awareness or experience: let us term it 'blinding consciousness'.

Group Member: *Where is your home planet?*

We have no physical planet: we are a group of energy beings, and our collective energies form what you would term an energy planet. We are a large mass of individuated vibrations, which bond together joyously, and float in our own energy space. We are not dependant on sunlight or any gasses; therefore we can exist virtually anywhere in the Universe.

It is our joy to answer 'calls' like that of Planet Earth. You will not be able to contact us consciously. We ask that you are simply aware now, of what we are doing for your planet and its atmosphere. When the time is right, we will return to our own energy

space. We do not require your thanks, gratitude or appreciation: we work for all, simply because it is our joy to do so.

Let us now make way for another.

The Second Energy

Dear friends, the next visiting group is unable to channel directly through him (Sohrab); we will therefore act as energetic interpreters for them.

These particular energies are still so incompatible with his structure that he is unable to hold them. They have not become a part of Planet Earth and yet they have been drawn by your Ganesh consciousness for a future merger.

These energies are not even 'energy' as you know it. You could imagine them to be 'flashes of light', yet even this is inaccurate.

They will shortly anchor deep within the planet's surface, and are here to work with the re-distribution and the re-balancing of natural salts, irons and minerals.

Though they will not work with the human or animal kingdoms directly, they will have an influence on you. As they do this work within the planet, these elements within your bodies will also change and re-align.

They, too, have responded to a call from Earth's consciousness. Once they are fully anchored, they will work as they deem fit. You could liken this to putting yourself into the hands of an expert surgeon, who performs the operation delicately, using his knowledge and expertise.

These friends will be here for only a few brief weeks; but they will offer Planet Earth herself new 'safety measures' that she can later implement for herself, when humankind goes awry in the future.

After these are activated by Planet Earth, and when humankind then gets greedy or over-plunders her, there will be **instant consequences**. Please understand that we are not talking of 'retaliation', but simply of 'instant consequences'.

So if you over-use an oil field, or over-mine a quarry, in all likelihood, there will be an instant cave-in. Earth's bounty is indeed for your use; but not for your over-use.

Group Member: – *Is this is the ecological balance?*

🔥 Exactly! And this kind of lesson is necessary. When a child puts his finger in a fire and gets burnt immediately, he learns not to do that. But if he was to put his finger in the fire and only feel the pain two weeks later, he would not learn his lesson as quickly.

Be aware of this, dear friends. You may not be involved with these kind of plundering activities directly, but the effects of this will be felt in small ways too. Do not be disdainful of even a small patch of garden that you have, or a windowsill filled with plants. Be responsible with the food you buy and eat....if you contribute to this by overeating seafood in the breeding season, you will also suffer the consequences. This is not a threat, dear friends, it is an awakening.

These friends are unable to take any questions, but they greet you briefly and offer you their light and energies. They retract now. They cannot remain longer, as he may be damaged, even with this indirect contact.

The Third Energy

🔥 Greetings, dear friends!

We are also unfamiliar with this planet. We are 'beings of pure light'. We have come right now, in preparation for the energetic period you term **Diwali**, during which time our energies will be disseminated to all on Planet Earth.

This year, we ask you to please view this particular time period beyond that of a festival pertaining to a particular community or country. It will be a potent energetic period for all on planet earth, regardless of whether or not they are even aware of the festival.

During that time, our energies will be directed primarily at the human and animal kingdoms; and secondarily at the plant and mineral kingdoms.

Our light energies are such that when you imbibe them, they will take you to different dimensions within self. We are not speaking of past lives, alternate realities or parallel existences here; but of those dimensions that already exist within the self, that you do not acknowledge. We are speaking of aspects inherent to your soul vibration.

Let us illustrate this with a practical example: Mr. X, a hard-core businessman, may have latent, creative soul vibrations, which he has not chosen to exercise in this lifetime. With our infusion, he may suddenly choose to explore this 'hidden' aspect of self. This does not mean that he will go into the performing arts; but he may suddenly come up with extremely creative business strategies. These kinds of opportunities will be offered to you during the Diwali period.

Dear friends, you are being deliberately forewarned, so that you can use this upcoming energetic time period to consciously fill yourselves with our light, and explore the unknown within self!

Portal after portal will open up for you. Walk through them joyously and fearlessly, discover new aspects that you never knew you had, and *celebrate who you are*.

You will have the opportunity to explore even those parts of self that you have resisted in the past (science or mathematics, for example), and even excel in them. The choice is, of course, yours. Push yourselves, and ask, “What aspects do I wish to consciously and deliberately wish to explore?” And then do so!

How we will work will be like this: we will act as internal, reflective mirrors, taking your strands through a series of inter-connecting images, and amplifying them, so that one point of light can become as bright as a star.

We will not take a few questions.

Group Member: *Can we start now, or do we have to wait until Diwali?*

■ You can indeed start now, but the full force of our energies will only anchor to Planet Earth during that period. But you can experience the initial build-up, starting now.

Group Member: *We often desire a change that may not be in our best interests, so how do we work with these energies in balance?*

■ If this is your conflict, then simply use our energies to amplify ‘clarity’ within self! Ask for well-being, balance, expansion, energetic awareness....anything that you choose!

If, for example, you are mired in a situation filled with conflict, don’t ask for the situation to ‘come out in your favour’. Ask, instead, for a smooth amplification of the events, so that they come to the surface and clear themselves out; and at the same time, as for the wisdom, strength and clarity of mind to resolve them, peacefully and amicably.

Group Member: *How long are you going to be with us?*

 The energies will be fully anchored during the Diwali period. It is likely that we will be with you for several months, but this will depend on the decision of your collective consciousness. So we will stay as long as you decided that we should.

We leave you in joy, love, and light. We are the Crystalline Beings.

BLESSINGS, DEAR FRIENDS!
BLESSINGS AND AN EMBRACE FROM THE GANESH COLLECTIVE.
