## THE ENERGETIC GIFTS OFFERED TO PLANET EARTH

BY THE MASTERS DURING 2014 (Part 1)

JESUS CHRIST  
ARCHANGEL MICHAEL  
MOTHER MARY  
JUDAS  
OSHO  
SAI BABA  
ST. FRANCIS OF ASSISI  
MEHER BABA  
MAHA AVATAR BABAJI  
LADY QWAN YIN  
MOHAMMED  
ZOROASTER  
GURU NANAK  
KRISHNA  
SHIVA  
THE COBRA

Greetings!

Before we begin the discourse, we would like to ask for your help. There are present, in this energetic space, several souls who have shed the physical and have passed over, but are reluctant to acknowledge their new state of energetic beingness.

These friends are therefore reluctant to accept the presence of many Guides and Masters who are urging them forward. Since these souls are newly passed over, they are more familiar and comfortable with earthly energies like yours. We ask you to collectively urge them forward on their journey into the light.

Using your own energies, offer them security. Energetically embrace them, as you would an insecure child. You do not need to know who they are, but we tell you there are hundreds present here today. Kindly do this now. (Long pause)

Bless them and return to full consciousness. You are thanked on behalf of these friends.

Dear friends, last week you were introduced to a month-by-month breakdown of the energetic structure of 2014. Today, we will begin to share with you energetic gifts that various Master energies offer you this year. These gifts will benefit the human race and all of planet earth.

Please understand that all the Masters will continue to offer what they usually do. The Christ, for example, will continue to work with the force of love, but this year he will add to this.

A gift can naturally be accepted or rejected: that is your divine right. But at a higher soul level, most of you will be working with combinations of Master Energies this year, accessing these at various moments, in a manner appropriate for the earthly and extended selves.

Even if a certain person is extremely resistant, at the conscious level, to the gift of love; he will be taking it in at a higher energetic level, so that at a future time, when he is possibly more open, receptive or even vulnerable, the energies will percolate down into the physical. But we don't anticipate much resistance from most of you, who joyously interact with Master energies on a regular basis.

We will begin by sharing the specific gifts being offered this year by a few Masters, after which you may ask about your personal favourites.

***The Christ, during 2014, will offer you the opportunity to touch social awareness, social responsibility and joyous, open 'giving'.*** The word 'giving' here goes beyond physical and financial generosity; it refers to the giving of the self. You will be urged to share with others your love, knowledge, wisdom, expertise, guidance, advice, awareness and laughter...

Within the Christ office, ***the Archangel Michael commits, during this year, to help you specifically clear cluttered brain pathways.*** He will help you de-fragment old thought patterns, and will help with the opening up of the brain, pituitary and pineal glands, and the third eye.

Should you access his energies, you will find greater and greater clarity of thought, purpose, direction and vision; a better understand of the self, the world and the Universe; and most importantly, helping you de-clutter your daily life, so that you now do not get so tangled up in surface events. He will help you move through them more speedily and effectively.

The Michael energy would be ideal, for example, for any student studying for an examination. Or for those who want clarity about a situation in which they feel enmeshed. It would be perfect if you are confused about a relationship, and desire to view it from a clearer, wider perspective.

But if you draw upon the Michael this year, you then cannot fall back on convenient excuses. You cannot then say "I wasn't aware". You cannot then prefer to live in victimhood, submission, smallness and lack of self-esteem. The Michael energy will propel you through all of this, so that you achieve a new level of power and potency.

***The Mother Mary offers you the opportunity to nurture the Inner child.*** This is her exclusive task during 2014, beyond that which she normally offers humanity. Should you call upon her energies, she will help you love, nurture, understand, and communicate with your Inner child.

Remember, we had earlier said that this year your personal inner child is going to be very vociferous. It is going to want to stand up and speak out. It may even go into imbalance, where you find yourself loudly expressing anger, irritability, tears, and passion. This must happen. Do not tamp it down. It must first express itself, before it comes into a new space of expansion, natural communication, and balance. The beautiful Mother Mary energies will help you through this process.

***The Judas energies are extremely prevalent on Planet Earth right now. They are here for one reason: to help you shatter outdated cellular and mental concepts and beliefs.*** This energy is one of the most misunderstood in the Universe. It is an energy even more loving than that of the Christ. Only a soul who was love-filled could choose to come to earth, and play the role of the eternal betrayer and villain, so that the Christ story could play out and benefit mankind forever.

This soul, beyond being so loving, is also one filled with courage, strength and potency. It requires great strength to be hated, despised and reviled for all times; and yet to continually withstand this, remaining balanced and centered.

Change your perception of the Judas energies, and connect with them as a joyous friend. Do not take our word for it: experience them for yourself. You will be astounded at the love and power that these energies contain.

The Osho, the magnificent Osho, has moved into a new space of personal expansion and evolution. ***The Osho is a multi-dimensional, multi-Universal Master; and he offers you, during 2014, the opportunity to once again look at yourself in a Universal mirror and to change self-perceptions at will.***

Should you call upon him, he will bring to your attention those aspects that you constantly reject. “I am ugly”, “I am stupid”, “I am not good enough”, “I am not potent enough”, “I am not worthy of”, and so on. Call upon his energies with care: should you choose to interact with them, aspects will be brought up, mirror-like, for you to recognize, acknowledge and then assimilate.

***The Sai energies (and here we refer to the Unified Sai: Sai Baba and Satya Sai Baba) being Universal, offer you the joyous opportunity to further explore the Universe.*** Use these energies in the dream state, in the day-dream state, and in your meditation. If you do, you will be taken on magnificent voyages, wherein you will be able to explore the Universe, and other aspects of the self in different timelines, dimensions and realities. You will also be able to download Universal knowledge and wisdom to the degree you desire.

***The St. Francis of Assisi offers his services, once again, to the animal kingdom, giving them the opportunity to upgrade their energies in a manner they desire.*** In the past, collectives of animals have desired unified upgrades. House pets, last year, for example, desired a collective upgrade to better relate to their human benefactors. The tiger collective (which is slowly exiting

the planet) desired better universal knowledge, so that they could initiate the transference from an earthly form to a far more sophisticated Universal one.

This year, however, even though there are still collective choices being made by various groups; each individual animal has also been given the choice to upgrade in a manner suitable to the self. One individual house dog, for example, may choose to incorporate into the self an understanding of his human benefactors to a degree far beyond the choice of the dog collective.

Animals this year are working at a much higher conscious level than before, and are making beautiful, unique, personal choices. St Francis will assist in this process.

***The Meher Baba is going to surprise you this year. He is offering a boost to the consciousness of those who desire scientific and technological advancement.*** How different from your perception of the Meher; yet he is a Master scientist, mathematician and astronomer.

Many scientific and technological breakthroughs that emerge this year will be a result of the provocation that he will offer the human brain, mind and consciousness.

***The Maha Avatar Babaji offers his energies specifically to Planet Earth herself.*** He has been invited by her core center to instill into her structure a new vibration, a new frequency and a new pulse, appropriate for the evolution of the Planet herself, but for all her kingdoms as well.

His consciousness, if accessed by you, will work brilliantly to stimulate your creative processes and will help instill in you a new level of self-empowerment.

Now you may ask about any Masters of your choice...

*Lady Qwan Yin?*

*Zoroaster?*

*Prophet Mohammed?*

***The Lady Qwan Yin, the Oriental form of the Mother Mary, offers a different gift in that avatar. She will work to stimulate art, beauty and creativity.*** You can now see that this is very linked to Mother Mary's work: stimulating the Inner child. Only then can art, beauty and creativity arise.

Most creative people will subconsciously be drawing upon her energies to stimulate their structures, ideas, creativity, abilities, visual and tactile senses, communication, and so on. As an offshoot of this process, she will also be instilling new energies into all colours on planet Earth.

Most of you are familiar with the energetic significance of colours: you know, for example, that the colour purple holds very high vibrations; that green denotes love, red power, and so on. This

year, all colours will contain not only their original energies; but also new, upgraded ones. Discover them as you interact with different colours this year.

Ladies, in particular, will find this year that they are suddenly drawn to colours that they have, in the past, either avoided or disliked. If this happens, do not allow your old conditioning to rule your choice: go for it. Wear it, or surround yourself with it, and reap the benefits of its new, enhanced vibrations.

***The Mohammed, the glorious expansive Mohammed, is going to take Planet Earth into the 5<sup>th</sup> dimension.*** His energies are one of the most expansive you can interact with in 2014. They are vast and magnificent. His energies go beyond your earthly qualities of love, brotherhood and compassion. They will help catapult Planet Earth into her magnificent future.

His energies will serve you in exactly the same way, taking you light years ahead of where you were before.

***The Zoroastrian energies, during 2014, could be termed ‘ blossoming energies’.*** They will help you unfurl your petals, shine brightly, and declare proudly, joyously and expansively to the world WHO YOU REALLY ARE. These will also help expose corruption, scams, contraction, and pain: all of which have to come to the surface before a new inner light can emerge.

Dear friends, please remember that the energies of every single Master are for use by every person who chooses to interact with them: they are most certainly not bound by religion or community.

Interact with these energies if you want a career boost or a new opportunity to come your way. Call upon them when things don't seem to be moving in your life. They are beautiful energies: we urge everyone to work with them during 2014.

Go ahead and question us again.

*Guru Nanak?*

*The Krishna?*

*Shiva?*

*Ganesh?*

***The Guru Nanak collective continues to work with reconstruction of the self.*** Anyone who really desires to shift, evolve, grow and develop is to connect with this collective. They must then commit to complete reconstruction, as once these energies are invited in, the command cannot be reversed.

So consider well before you choose to invite this energy into your life: once initiated, the reconstruction will start, and will continue for as long as it takes to achieve the outcome. The pace of this reconstruction, however, can be governed by you.

Let us take an example... that of a woman who feels trapped and helpless in a marriage. If she calls upon this energy of reconstruction, the marriage will begin to change and shift; as will she and her spouse. But the direction in which the marriage goes will be governed by the higher souls of both parties. If it is deemed best for the marriage to end, then events will take place that facilitate this outcome. Then there is no going back: she now cannot say to herself "I am too weak and helpless to live alone. I would prefer to stay unhappily married."

However, if you connect with these energies in your power and glory, they can only serve you in magnificence. They are not energies of pain and trauma; they are energies of joy, love, support and reconstruction.

***The Krishna, during 2014, will work specifically with your extended chakrik system.*** This includes the major and minor chakric points in your body, as well as the higher chakras in your energy field. He will use the vibrations of cosmic sound and music to upgrade this system, offering you the opportunity to experience the rising of the kundalini, not just in your earthly chakras, but traversing time, space and dimension. He also helps you access Universal knowledge, wisdom and cosmic music.

***The Shiva energies, during this year, will help you turn yourself upside-down, inside-out, and even stand on your head. (Laughter) These are energies that will lend themselves to every layer of your consciousness: mental, physical, emotional and spiritual.*** They will also work on the sub-layers and sub-sub-layers that extend within and around you.

Let us give you an amusing earthly image. Imagine you are a multi-layered cake, filled with thousands of layers. Layers of chocolate, cream, sponge, and fruit. The Shiv offers his light to each layer, subtly and individually. This means the kinds of changes that take place in your structure will be subtle and minute, mostly unrecognizable consciously, but life-changing. Life-changing.

Should you shun every other energy, we urge you to at least work with the Shiva light during 2014.

The chocolate will be changed in sweetness, taste, texture and refinement. The sponge may be given strength and crispness. The fruit will be enhanced, and offered new sweetness, flavour and colour. The icing on top will sparkle, attracting new energies to your structure. The entire multi-layered cake will evolve.

Dear friends, we must end the session today. We assure you we will continue next week, and the week after if need be, to answer all your questions. However, before we end, we would like to speak of one more energy today: that of the Cobra.

The Cobra energy is very important for 2014. You are already aware that the cobra symbolizes the rising of the kundalini, power, focus, single-mindedness and dedication. It also signifies knowledge, wisdom and experience.

***This year, the Cobra energy will act as a Universal strand, thread-needling the Universe. As it moves, snake-like, it will gather energies from different Universal societies and areas of high intensity, continually increasing in power, potency and magnificence.***

As it passes through Planet Earth, it will offer her the opportunity to avail of all of this. It will further carry forward Planet Earth's experiences to other Universal societies.

This energy, in conjunction with the Mohammed collective, will help you move into the 5<sup>th</sup> dimension. If you find snakes invading your thoughts, dreams and meditation, do not be fearful. Instead, acknowledge the presence of the Cobra energies, with which you have most definitely interacted on a very personal level. It would be beneficial to choose to meditate upon the symbol of the Cobra this year.

You are blessed today by the energies of a Cosmic Overlord collective. You are in our embrace.  
BLESSINGS FROM THE COSMOS.
