

## SOHRAB'S TRANSCRIPT

25<sup>TH</sup> DECEMBER 2014

### THE THREE WISE MEN

### THE SYMBOLS OF CHRISTMAS AND THEIR ENERGETIC SIGNIFICANCE DURING 2015

### THE PHYSICAL PRESENCE OF ANGELS ON EARTH DURING 2015

*(Sohrab requests a group member, D, to open the meeting. She sings a couple of Christmas Carols. He then goes into a trance and beckons to a family to bring their baby Y up front for a special blessing.)*

You have a handful in him! Willful, stubborn, dogmatic, opinioned...magnificent! Loyal, fierce, powerful, focused...magnificent! Blessings!

Greetings all! GREETINGS FROM THE LORD SANNANDA.

Yes, the Jesus Christ in a different form. For those of you who do not know this, the Jesus Christ heads the Ashtaar Command in the form of the Lord Sannanda. The Ashtaar Command is a group of Lightworkers from every corner of the Universe, who band together to offer service to various beings and societies.

***In this avatar, although he always works with the basis of love, his predominant attributes are focus, leadership, balanced command, wisdom, magnificence, expansion, light and joy.*** He will be bathing Planet Earth and her inhabitants with these attributes during this Christmas season.

This impetus is necessary for the human race right now. Ride upon these energetic waves throughout 2015. Should you choose to connect with the Christ Office, do so acknowledging and exercising these attributes within the self.

This year the Christ/Sannanda energies will not be focusing upon gentleness and a soft embrace. These are, of course, qualities inherent to the Jesus; but his focus this year will be to help you assume leadership, to take charge and to move forward fearlessly, in joy.

(Beaming) You are Lightworkers; each and every one of you. The Jesus/Sannanda offers you an energy tool to use this year. Should you choose to connect with his energies for self–healing and growth, or to spread to others, do it this way.

First visualize a metallic, silver-white orb in your right palm. Then visualize a lightning bolt clasped in the left palm.

*(The J/S demonstrates this through Sohrab. The right palm is open and slightly outstretched; whereas the left palm is in a grip, as if holding the lightning bolt, and is raised up slightly higher than the right palm)*

Do this for a few seconds, and then drop the palms and continue the work at hand. You will find your work increasing in intensity.

(Indicating the family with the baby) You could do this, for example, when you find your child is in a cranky, stubborn or willful mood. Activate the two energetic symbols and then embrace him. He will respond to this.

THE LORD SANNANDA BLESSES YOU ALL.

(Sohrab shifts energies)

THE COLLECTIVE ENERGIES OF THE THREE WISE MEN GREET YOU.

Were there three? There were actually many more who came to visit the Christ at his birth. But the three chronicled were of prime importance for the activation of the Christ energies within the body of a little baby.

All their ‘gifts’ have particular energetic significance: gold, frankincense, and myrrh.

*The wise man carrying the gold was, in truth, offering the Child and humanity, through the Child, the gift of Abundance.*

*The wise man carrying frankincense offered the Christ, and humanity, the gift of fragrance.*

Here, when we speak of fragrance, we refer to the activation of all the five senses. Of being able to see and appreciate the beauty around you; of being able to listen with alertness, non-judgmentalism and joy; to be able to smell and taste the fragrance of life experiences; and to be able to touch another, offering your fragrance to them.

***The wise man offering myrrh offered the Christ, and humanity, the opportunity to grow and evolve mentally, scientifically and technologically.*** For example, the energetic seeds sown at that time prepared humanity for the current computer era.

It may also interest you to know that the World Wide Web was an ‘alien gift’. Yes, the Ashtaar Command facilitated this, at the time when human consciousness was ready to receive it.

*(A note from Sohrab: As I am transcribing this, I get the strong feeling that one of the wise men was the ‘Walking Zarathustra’.)*

Now, ***let us speak of a few symbols of Christmas, and their energetic relevance in 2015.*** You may recall that we did this little exercise a few years ago; but we would like to do so today, with specific reference to the coming year.

Let us ask you for various symbols of Christmas.

*Bells?*

***The bells, in 2015, refer to new inner vibrations that you are beginning to generate, starting now.*** Each human has initiated this in various body parts. For example, one person may start this process in the heart and lungs, whereas another may start it in the knees. But no matter where you begin the process, you all desire to vibrate at an overall higher frequency.

***This vibration is going to initiate a re-generation of that particular area, which will then spread to other body parts.*** It may interest you to know that some who are apparently suffering from incurable diseases may use this bell vibration to change their course and recover.

### *The Celtic Cross?*

The Celtic cross has a different structure and geometrical pattern to the 'normal' cross.

The basic symbolism of the cross remains the same as before. The vertical line of the cross is indicative of the connection between 'heaven to earth', or matter and spirit. Your connection with your own higher soul and Divinity. The horizontal line of the cross refers to your connection with life on earth. The central meeting point where the two lines intersect is your third-eye.

The Celtic cross is going to infuse, during 2015, new sacred geometry into your structures. This applies exclusively to the Human race. ***Through the energies of the Celtic cross, you are going to upgrade your current DNA, activate new strands in it, and also add new sacred geometrical symbols into the self, to help you grow and evolve at an accelerated pace.***

This would be an ideal symbol to use in meditation, if you are trying to study or learn a new concept. ***Students, in particular, would benefit from this symbol.*** (Turning towards a few young students in the room) Why not draw this symbol on your books, or hang one on your computer? Its energies will help you focus better, and easily understand that which you are studying.

### *The star?*

***This year, the star can be described in one word: multi-dimensionality. Anyone who chooses to meditate or focus upon the image of a star will be easily able to touch another incarnation of the self, in a different timeline, realm or dimension.***

### *Santa Claus?*

This refers to two aspects of the self.

***The first: the inner child.*** The Inner child who gives gifts to the self. One who is jolly, merry, carefree and filled with laughter and joy.

***The second: The one who embraces all aspects of the self.*** Santa Claus is traditionally 'fat'. Yet he does not feel fat, nor apologize for his size. He embraces it. He revels in it.

The Santa embraces all aspects of the self, because he fully embraces his inner child.

*Holly?*

***This year, this represents the triumph of the human spirit over the vicissitudes of life.*** Exactly the same energetic thrust as that of Jazz music. This helps you examine the tangles of daily trauma, look at it from a wider perspective, understand why you have created it, make a course correction and move beyond it.

The prickliness of the holly represents adverse circumstances; but its toughness and strength is your triumph over these.

*Mistletoe?*

Yes, exactly what you are thinking...kissing under the mistletoe. It is a symbol of self-embrace, self-love, self-appreciation, self-acknowledgment, self-acceptance, and self-worth. You are really learning to 'to kiss yourselves'.

*The Christmas tree?*

What does this represent to you?

(Various Group members answer)

*Growth...Expansion...Stability...Happiness...Celebration...Beauty...Gifts...  
Strength*

Yes, it is all this, and more. ***It is symbolic of your life, in this incarnation on Planet Earth, and what you make of it during 2015.*** It has the potential for all these qualities, but it depends on you.

*The colour red?*

An excellent question! What does red signify to you?

*Love...action...strength...passion...anger...stability...identity...success*

All perfectly correct. This year, this is extremely important to work with. You may choose to wear it, or to think about it, or to energize the self with it. The frequencies of the colour red are upgrading and reinventing themselves this year.

***This colour will help you push through boundaries, so that you can take the self wherever you desire, in any manner you desire.***

You could call this a 'spaceship'; one taking you to any destination of your choice, so that you better discover the self and the Universe.

This year, use this colour while meditating. Put aside the normal choice of a pastel shade. Bathe yourself in a very vibrant tomato-red, and explore the self. You will go places you had no ideas you could.

*A Snowflake?*

This represents your energetic subtlety and texture. As you well know, each snowflake has a different composition. Each is unique.

***So this is the perfect symbol upon which to meditate or focus, if you want to discover and explore your inner subtlety. Your undiscovered texture. Your hidden aspects. Your depths.***

*The poinsettia?*

***This is symbolic of you declaring to the world WHO YOU ARE, with no apologies...shining bright.***

*The reindeer?*

This year, this energy is synonymous with that of the Hanuman. ***It offers you inter-dimensional travel.*** It will help you move effortlessly between ideas, thoughts, words and action. It will help you explore the extended self, in all its aspects and incarnations. It will help you explore the Universe.

*The Sleigh?*

***This is representative of your personal chariot, you being the self-declared God figure.***

We suggest, dear friends, that you actually create an energy chariot in which you ride this year. Visualize it in any way you desire. A man may choose the image of a sports car. Someone else may choose the image of a rose. Any symbol that pleases you.

Spend a few moments in the morning doing this, and then go about your daily work 'riding in the chariot'.

***We urge you to keep this symbol entirely private.*** Do not tell anyone what it is. Because it is a structure very carefully created, energetically, to suit the self and no one else.

If you describe this to your loved one, he may, in the process of simply visualizing it, accidentally activate some of the energies in his structure. This may be counter-productive to his growth and evolution.

Now if you have, for example, created a personal lotus, it does not mean that you have to visualize the self floating on this symbol all day long. Create it in the morning, placing yourself in it, and then just know that you are going to ride in it all through the day.

You will have to re-create this symbol on a daily basis. And this symbol may change from time to time. Allow it to do so. It is the energy that is important, not the visualized form. That is simply for your convenience.

Any more questions?

*I have been thinking about the Celtic cross. This seems to me to already be inside our body. The horizontal line is represented by our two eyes, and the vertical line is the head-to-toe structure, perhaps the chakric system?*

Yes, you are absolutely correct. Every single symbol discussed is contained in the body.

Let us speak for a minute of *the Rainbow*, which is considered a symbol of Christmas in northern European countries. ***This is symbolic of embracing and containing multiple frequencies and Universal energies. And this is an actual halo that you all have, invisible to the naked eye; one which floats above your crown chakra.***

The Reindeer energies are housed in the pituitary gland.

The bells are actual energies you are generating in various body parts.

The energies of the tree are housed in the spinal column.

Snowflake energies are housed in the DNA.

*Where is the star?*

In the past, these energies were in the crown and third-eye chakras; but this year you have moved them to your hara chakras. Men store these in the prostate.

*Could you speak of the symbolism of the glass of wine?*

***Cheer, merriment, nourishment and intoxication.*** And when we speak of intoxication, we mean getting intoxicated by life. Appreciating and embracing everything you experience, with equal fervor. Being passionate about life.

*The Hay in the Manger?*

***This symbolizes your ability to transmute an event or a situation in life, into anything else you desire.***

Hay is coarse yet comforting, like the painful or powerless situations in life that you just accept, as they are familiar. The abused wife, for example, justifies this by saying to herself “He hits me because he loves me”.

But this year, the hay represents your ability to shift out of comfortable familiarity, and change your life around. *It is symbolic of energetic alchemy.*

The hay energy is a very pro-active one. Use this symbol and meditate upon it to help spur you into action, so that you are motivated to change around your business, your finances, your inter-personal relationships, and so on. Spin the hay into gold.

*The Manger?*

Normally, this would be symbolic of house, home, heart and happiness. But this year, it is symbolic of a portal or wormhole, offering you the opportunity to go where you desire.

*Stockings?*

***This is directly connected to the stomach and digestive tract; and it is reflective, this year, of that which you put into your physical bodies.*** So please fill your stockings, but don't over-stuff them!

BLESSINGS! YOU ARE IN THE LIGHT, JOY AND EMBRACE OF ST. GERMAIN.

(Sohrab shifts energies)

THE ANGELIC REALM GREETES YOU.

There is a magnificent new merger taking place in the Angelic realm around planet Earth: we are upgrading at a very rapid rate. We are absorbing ‘star energies’ from different Universal sources, and are shining brighter and brighter.

***We also choose, this year, to make ourselves physically seen, heard and felt by the Human Race.*** Please open to us, and allow yourselves to experience us very tangibly and practically.

*How will you do this? How best do we do this?*

We are going to enter and energize your extended energy fields. This, of course, is being done with your higher-soul permission. We will be working with your energy field consistently during 2015. This will, hopefully, help you see us with the naked eye.

Some will experience flashes of light. This may worry you, and make you think you have vision problems! You will also see us from the corners of the eyes.

You will also see Angel Dust from time to time. This is not dust at all; but particles of our high-vibration frequencies. If you tune into our energies while in a calm and relaxed state, you will see this with eyes wide open. Angel Dust may appear to you as silvery tinsel, or as unusual air currents.

You will also experience the angelic touch physically, if you are relaxed enough. From time to time we will touch your hair, or brush past you. Some will experience this as a shiver down the spine.

We also urge you to be alert to Angels who appear to you in human form. We will be infiltrating human bodies from time to time, if we need to communicate directly with you.

Let us say that a person is in great trouble, and asks us fervently for help and guidance. We may appear to them through a friend or stranger, and give them just the right piece of advice.

Dear friends, we will come to you repeatedly; but if you are blocked, these visitations will go unnoticed and unheeded.

Dear friends, please bless all the names mentioned earlier, and yourselves, with pure silver-white light. Bathe in it. Feel and see the Angel Dust in this room. Look at it with eyes open. De-focus slightly, if this helps you. (Pause)

(Addressing D) Dear one, we call upon you once again, as your particular frequencies are needed to end this session. Kindly sing for the group again: you may repeat a song, or choose another.

BE IN JOY.

(D closes them meeting with a rendition of “Silent Night”)
