

Sohrab's Channeling

3rd March 2016

THE ENERGETIC CONTRIBUTION OF VARIOUS MASTERS TO PLANET EARTH DURING 2016

Greetings!

Today we would like to begin this session with healing. This is because many of you also need the healing today: some for physical ailments, others for emotional issues, and yet others for practical issues like court cases and so on.

Take a moment and visualize the list of people just mentioned, and then visualize yourselves in the energetic field that you have just created with your focus and silence. You have created a beautiful, gentle field of energies today: bathe in it, and invite it into your mental, physical and emotional bodies. Enjoy it in silence for a few moments. (Pause)

We ask you to repeat this command after us: I CHOOSE TO REFRESH, REJUVINATE AND REVITALIZE THE SELF. AND SO IT IS, AND SO IT IS, AND SO IT IS. (The group does so)

BLESSINGS FROM THE MOTHER.

(Sohrab shifts energies)

Greetings dear friends!

During the last session, we outlined a general energetic horoscope for the upcoming year. Today, we would like to speak of the *energetic contribution of different Masters to Planet Earth during 2016*. We will name a few, after which you may ask us about your 'favourites'.

The **Lord Jesus Christ** (and the Christ Office in general) is offering Planet Earth an unusual energy this year; one which is not generally associated with the Christ. This can be summarized in one single word: *drive*. *Drive is the ability to motivate*

the self to move forward in a focused and directed manner, to achieve a desired outcome.

On a practical level, if you are initiating a new business venture, embarking on a new course of study or want to bring a murky situation to a speedy outcome, call upon the energies of the Christ Office to flow through you and embrace the situation at hand. Then bring the energies back into the self. This way, you are creating a magnificent energetic loop that will continue to flow faster and faster.

To answer an unspoken question “What of the other qualities of the Christ?” Of course they continue to exist. But this is HIS prime focus this year, in the form a gift to Planet Earth. By instilling in people the energies of Drive, he will also offer them the opportunity to do so with love, gentleness, compassion, understanding, nurture, embrace and so on.

The **Lord Buddha** is choosing to offer Planet Earth and all her inhabitants the frequencies of *self-revelation*. If you choose to draw upon these energies and self-search, you will discover facets of the self you never knew existed, you will be able to better understand the self, you will be able to work out self-related problems, better understand your patterns and modes of behaviour and so on. All of this will offer you the choice of making internal shifts and adjustments; and by doing so, evolving into *who you choose to be*.

The **Ma Kali** offers Planet Earth another unusual quality: the ability to dissect situations at hand that appear to be confusing...in short, the *energy of clarity*. So this year, whenever you feel confused or unable to comprehend something, instantly call upon Her frequencies. The situation at hand will suddenly start to get clearer and clearer. These energies would be ideal for students to use when studying, or for people who are enmeshed in a situation in which they don't know how to move forward.

The **High Lord Mitreya** offers Planet Earth a new infusion of *strength and self-assurance*. The ability to stand firm in the face of adversity, and to hold one's ground. Those who continue to play the victim game are invited to draw upon these energies. They will then find themselves able to stand up to a boss, a dominant spouse or any other oppressive authority figure.

The frequencies of the **Krishna**, always cosmic and always musical, offer you the opportunity, this year, to *read between the lines*. To pick up the sub-text of another's words and to examine a situation and go straight to the core of it, without getting caught up in external trappings. The ability to read others better. The ability to read the self better. To read between the lines.

Now you may ask about your favourites.

The Lord Shiva?

What do you associate with the Shiva?

Calmness and infinite potential.

The **Lord Shiva** offers you just that: *limitlessness*.

Most humans tend to see themselves as small, limited, unable to move forward, unable to comprehend advanced information, unable to do more than they think they can, unable to achieve their goals and so on. The Shiv offers you, this year, the opportunity to touch an inner flame of limitlessness.

This is extremely important during 2016, as this is a year which is going to move at lightning speed. Situations of all kinds are going to arise with no forewarning. You have to be able to 'think on your feet' and make speedy and informed decisions. Not hasty decisions, but speedy ones. These energies will help you deal with unexpected situations, so that you can face them in expansion and perfection.

Zeus?

What qualities do you associate with him?

Strength, the force of love, and power.

The ancient Greek and Roman frequencies (we will not term them "Gods" anymore, as they are now pure frequencies) are now re-visiting Planet Earth this year in a new and magnificently upgraded form. Do not use the visual of the Ancients as you know them from myth; instead try and tap into their pure energetic forms.

These frequencies have no official names anymore. However, for convenience sake, we will refer to them as the Zeus frequencies. They will offer you ***the opportunity to transform the self, in any way you desire.*** This could include changing your state of health, or physical form, or mental capacity, or the way you function...beautiful energies for self-transformation. Draw upon them and enjoy them: they are yours to command.

Which energy will look after the weather conditions of Planet Earth?

There is a ***specific guiding energy for Planet Earth this year***; one going beyond just weather conditions. This Master Trilogy will be working for diverse aspects of the Planet, and will also support other Master energies that are working with Her.

This Master Trilogy is led by Maha Avataar Babaji. The two other forces are those of the Meher Baba and the Lady Kwan Yin. An interesting combination. Let's understand why.

The energies of the Maha Avataar Babaji are, this year, those that will support reconstruction. This is what Mother Earth desires: for herself and for all her inhabitants. Reconstruction is necessary to help the collective increase its vibrations, re-adjust its thought patterns, belief systems and modes of behaviour, to bring about an upgraded version of the self.

The Lady Kwan Yin offers pure love with total focus. Her love is focused, and directed mercilessly. Yes, an unusual choice of words: merciless love. Merciless love loves so much that it knows exactly what to do, how to do it and when to do it. It could be likened to a mother exercising 'tough love' with her wayward child.

The Meher Baba adds to the trilogy a sense of ease, joy and playfulness. He will help you reconstruct the self, exercise merciless love, and yet temper it with a sense of fun and wonderment.

This Master Trilogy is not just forming a triangle; it is forming an energetic vortex. This vortex will draw into itself other necessary Universal energies and distribute them to Planet Earth and all her inhabitants.

Sai Baba?

(Smiling) We were waiting for this one. It is the Sai who speaks today. The Sai, as most in this room know, is a purely Universal Energy. For the benefit of the newcomers, the Sai works with over 300,000 Universal societies. Earth is but one of these. And in each of these societies, the Sai is known by a different name, form and frequency. Such is his expansion that he is able to work with all, in a manner they can best receive his frequencies.

The Sai continues to do so this year, bringing about Universal Harmony. He is urging every aspect of Himself to draw together his children in Universal Embrace.

Hanuman?

Another Universal energy. ***The Hanuman collective acts like a Universal Web, allowing energies to flow seamlessly between different parts of the Universe.***

Yes, this is similar to the Sai, but with subtle differences. ***The Hanuman Collective is offering beings from different societies the opportunity to actually communicate with one another.***

He hopes that, by the end of this year, more and more lay people will find themselves in communication with their own higher souls, and also with other beings from different societies.

The Archangels?

A whole new realm of Archangels has now begun to interact with Planet Earth. These are energetic ‘cousins’ of the Angels with whom you are familiar. So let us speak of both groups.

Your friends in the Angelic realm are working individually with different aspects that will benefit your planet; but as a collective they are, this year, ***stimulating your pituitary and pineal glands. This gives you the opportunity to think ‘out of the box’.***

Each person will choose how and where to use these energies. Some may focus them on one single area; whereas others may use them in different parts of their lives. Let us examine this with a practical example.

A farmer who opens to these energies will find himself much more ‘in tune’ with his crops. He will intuitively know when to harvest the crops, how to better fertilize them, how to increase his productivity, how to better market them and so on. This example is one of ‘specific focus’. But other people may multi-task, and apply these energies to different parts of their lives.

Now let us speak of the Angelic ‘cousins’. They are wonderful beings from other dimensions. Many are from the 7th dimension. Most of them have no names or individuated forms; they are pure frequency. They are here to prepare Planet Earth and her inhabitants for yet another energetic leap forward.

They have not entered the physical environs of the Planet. This is because their vibrations are too intense to be withstood by most humans. But they are energetically surrounding the planet, and are currently infusing the exosphere with their magnificence. You may tune into them if you so choose; but you would have to energetically ‘reach up and reach out’.

Would the Arcturians also be considered ‘cosmic cousins’ of the Archangels?

To a degree. They are energetically of a different strain; but at that level of vibration, every entity perceives itself as a part of the other.

Zarathustra?

In the past, we have explained that the thrust of these energies is to help anyone on Planet Earth be ‘the best he can be, at his chosen field’. Within this objective, the Zarathustra energies are offering humanity, during 2016, personal enterprise.

This is a boost in any endeavor you choose to initiate this year. This could be a job, or course of study, or changing the self...any endeavor on your part can be enhanced by drawing upon these frequencies.

The Osho?

This can be answered in one word: ***multi-dimensionality***. The Osho collective is now so potent that it helps people reach beyond the known self, and helps them explore completely unknown aspects of the self in different realms and dimensions.

Only those who are ready for this work will be able to access multi-dimensional aspects of the self; the others will, however, be able to explore the known self much better.

The Mohammed?

His magnificence has always been described as Universal Brotherhood. This year, however, the Mohammed energies are working on Planet Earth in a different manner. ***They are being used like a dentist's drill, to gouge out that which is not appropriate for the self.***

It may interest you to know that almost every human being has chosen, at a higher-soul level, to work with these energies. As of now, 99.7% of the human race is already interacting with these energies. They desire to root out debris from the self. The most used energies this year.

Mother Theresa?

Her energies are no longer individuated; they are part of a Universal collective. This collective is working, this year, as ***a pure catalyst to stimulate the self to grow and expand in any manner you choose.*** This is a wonderful energy to invite into your lives during 2016.

A footnote here: friends, when we urge you to invite into your lives various energies and Masters, you have the divine right to connect with as many as you so desire. Discover what suits the self as you play with them. Have fun. But play responsibly. Because if you are really not ready to touch the qualities we have described, and you initiate the energy flow, those qualities will most certainly emerge.

If, for example, you want to say small and victimized, then don't call upon the energies of limitlessness (Lord Shiva). Because once you do so, you will no longer be permitted to remain in the shadows, hiding in the background. And yes, you have the divine right to choose that which you desire. You may not be ready to tackle every aspect just mentioned. So play responsibly.

The Ganesh?

These energies, during 2016, are for ***self-education***. ***These energies will help you better understand an actual study course, or help you study the self in greater depth, or re-examine a situation in which you are hopelessly tangled***, and so on. These energies will promote knowledge, wisdom and self-education.

The Yogananda?

Courage, strength, wisdom and expansion. A magnificent foursome. But if you call upon these energies, you cannot choose three out of four qualities...all four have to be simultaneously embraced.

The Ashtaar Command?

These energies offer humanity ***self-realization***. Think about this term, it covers a lot of ground.

(Inaudible name)

This energy will help you discover ***who you really are***. Not to be called upon if you want to continue hiding behind facades. A beautiful energy for you, and a select few, to work with.

Isn't 'self-realization' and 'who you really are' the same thing?

It is similar. Self-realization increases your awareness of the self. Who you really are can be dangerous, as it urges you to embrace all parts of the self; even those you dislike or despise. Yet all parts are valid.

Mother Earth?

Gaia herself! We will end with this one.

The ***Gaia is going to work with tough love this year***. The Mother has always placed her children before her; this year she places herself first. This does not mean she will be cruel or merciless with her children; but she will enforce that which is necessary for her growth, her evolution and HER WELLBEING. Even at the cost of destruction of portions of her kingdoms.

The Gaia is going to retaliate quite strongly if she is, for example, over-mined, over-leeched or thoughtlessly treated. This is not punishment for humanity; it is a wake-up call. Her attitude will be “Don’t mess with me!”

We leave you now in joy.

BLESSINGS FROM THE SAI.

BLESSINGS FROM THE SAINT GERMAIN.

(Sohrab shifts energies)

Greetings!

We would suggest, even before you start playing with these energies, that you ***tune in and discover the guiding energy that you have individually chosen for the self, to lead you through 2016.*** In most cases this energy will be different to that of your established Master.

You will have to use your intuition. Search for your current leader and guide, and ask the self why you have chosen this energy. The answer will come from within, and not from an external source.

Some may be taken aback with their choice. Tune in all the more and discover why this is so perfect for the self.

BLESSINGS. THE BEHRAM YEZAD SPEAKS.
