

Sohrab's channeling

22<sup>nd</sup> February 2018

## UNIVERSAL BEINGS OF LIGHT

*(Sohrab begins the trance channeling, and has a lot of trouble containing the energies. He initially speaks out very slowly and hesitantly, grasping for words and concepts.)*

We are beings of light. We are not accustomed to this process of channeling. This is an experiment, as we wish to communicate with you directly.

Our presence here, in the vicinity Planet Earth, is brief. We are on a journey through the time/space continuum. We intended to simply be observers of your planet and its various species, but the opportunity to 'communicate directly' was offered to us by your consciousness; that is why we are speaking to you today.

Would you like to ask us questions about us?

*Of late, I have noticed that people in this city have been using demons and other dark forces to attack people. What is the best line of defense?*

We have, as yet, no knowledge of your societal quirks. You can only question us about us.

*Where do you come from? Far away? Are you even a part of our solar system?*

We come from far beyond your time and space. We do not have a solar system. We come from a different quadrant in time and space; we are in an alternate dimensional existence. We cannot give you an indication of distance; this cannot be quantified by linear measurement. When we move through time, space and dimension, there is no 'distance'.

*What are your observations of the energies of Planet Earth?*

We cannot understand the chaos we observe. We are attempting to assimilate this for our knowledge. From our perspective, we cannot understand what you term 'duality'; wherein there is so much light and darkness that appear to co-exist.

We are beings of pure energy. Energy does not understand duality. We have no concept of 'going off-track', as you do; we just flow. We are finding the experience of being in his body very odd; even disturbing. There is so much conflict within him.

*Are you here to help us?*

We are only here to observe. But if we choose to stay for a while, our energetic presence will be of benefit to those who choose to connect with us.

*Here is a question from my community to you. (Partially inaudible question)  
How do you want us to collide? Astrally? Physically?*

You are talking our language. You may connect with us astrally and through your knowledge of sacred geometry. Draw images. You will better understand us.

*Through portals and gates?*

We don't have gates. We flow.

*How do we open the time-line? You don't exist in time.*

We are timeless, so we cannot advise you. The fact that you are connecting with us now means that a shift has already happened for you.

*How can we learn to time-travel?*

We cannot guide you. We can only share our experiences with you. We have no difficulty in time-travel, as our vibrations are timeless. From your perspective, “we think it; and it is’. But our ‘thinking’ is not like yours.

*(Sohrab has a small collapse, after which the channeling continues a little more smoothly than before.)*

Since we are inter-dimensional beings, these gateways that you spoke of are not gateways for us at all. We are able to manipulate time, space and dimension at will. We can therefore be at any space, or in any timeline or dimension, in an instant. We do not ‘travel distances’; as you do. We simply draw the other time or space to us. We do not know how to teach you this.

*Do you have any suggestions for us?*

We find you have so many different, conflicting frequencies within your structures. You have intelligence and stupidity, wisdom and ignorance, power and powerlessness: all part of your duality. Our suggestion would be to focus upon those aspects which are beneficial to you; ones you already contain. We cannot ‘not’ do this.

*What form do you have? Are you part of a civilization?*

We have no planet like yours. We are beings of pure energy. If you could see us with your limited earthly vision, our ‘form’ would be something like a comet with a long energy trail. The head of the comet is our individuated consciousness and the energetic trail is consciousness we share with all.

We form clusters and move through the Universe...like a school of fish on earth. We have no home space; wherever we are is ‘home’ to us.

*Inaudible question.*

We have recently ‘arrived’ in your quadrant of space; we are acclimatizing to this process.

*(Now the channeling becomes fluid and fully coherent)*

He has now acclimatized to our energies; he has been unconsciously

fighting them upto now. They are strange and unfamiliar to him, and they are affecting his DNA. This is simply being upgraded with the process, but his DNA did not understand that.

*How do we best connect to you?*

Invite us to be with you. One thought; and you will merge our timeline with yours.

*What are you learning from us?*

We are observers of different species. Our quest in the Universe is to garner knowledge, wisdom and awareness. This is our 'food, water and oxygen'. We thrive on it. We do not interfere with the evolutionary processes of different societies; we are observers. However, on occasion, if we are specifically called upon by the consciousness of a society, we do help without upsetting their natural processes.

***We are currently observing your aspects of chaos and duality; two things utterly new and unfamiliar to our species. But we make no judgment.*** Do not feel that we are speaking from a position of superiority; we do not intend to sound like that.

Your culture has a lot to offer us; aspects we do not have. ***We are very interested in the concepts of free will.*** We, too, have free-will; but we never exercise it. As we are pure beings of the light, we never stray from the path. So there is no call to ever exercise free-will. Watching you exercise free-will to make all sorts of strange choices is, to us, utterly fascinating.

***Considering you live in a very harsh environment, we find the human spirit and your aspect of endeavor extremely honorable.*** We are amazed by it.

*Is there suffering, like we have on earth, in other Universal societies?*

We have rarely observed this level of suffering anywhere else. Other societies have a level of this, but it only occurs when they deviate from their natural flow. But they are also very easily able to change course, come back

on track, and alleviate their suffering.

On Earth, this appears to be very difficult to do. That is why we consider you very courageous for having chosen such a vigorous training ground.

*You spoke of us 'deviating from the path'. Do you have any idea where this is leading us in our evolutionary process?*

Societies like ours do not deviate from the path of the light and the flow. We cannot. Therefore our growth is steady. However, we have observed that, on earth, by making mistakes, you grow very rapidly. We do not know many spirit beings that would have the courage or the tenacity to choose to remain on Earth. We are impressed by you.

*Can you ever go out of alignment?*

When you have pure consciousness, as we do, which is just a flow... how can you deviate from the path? It would be like us asking you to willfully choose to stop breathing for 15 minutes. Could you do that? Of course not. It's the same for us.

This is why, when we observe people on earth unnecessarily 'holding their breath' for endless amounts of time, we find this very disturbing. But we also understand the challenges you are giving yourselves; from that comes your growth.

***Consciousness is a flow. It is the embrace of all that is. It is pure experience.*** You do have a form of consciousness on Earth, but with the deviations and interruptions in it, it gets convoluted. Your quest is to disentangle it ...and flow.

*How can you help us on Earth?*

We first have to be requested to do so by the collective consciousness. But, even as an individual, you now have the right to ask for our assistance at a personal level. And we will respond by giving your consciousness a boost; one that is beneficial to you but also one that does not interrupt the natural

growth process of your species.

Your collective consciousness is currently 'in discussion' with us, asking us the very same question, "How can you best serve Earth without throwing our evolutionary processes out of alignment?"

Think about the implications of this. If you were cavemen, and we offered you computer technology, the jolt to the society would be so devastating that you would not be able to handle it. You would surely self-destruct. In the same way, if we gave you an excessive dose of consciousness, it would throw all your process out of alignment; ones necessary for you to grow and evolve with personal endeavor.

However, ***it appears that we are going to be invited by your collective consciousness to gently introduce a new vibration onto Planet Earth; one that will spread a level of peace and harmony.***

*Do you experience emotions induced by the ebb and flow of your energy?*

Yes, we do; ones very different to earthly emotions. Ours are far more streamlined than yours. We do not have detrimental emotions like hatred or anger. But we do experience the flow of love, expansiveness and warmth. We know pride when we experience the expansion of the Universe. We experience awe and wonderment: our flow keeps us in constant touch with the Creator. Creation is awe-inspiring.

*Is there life, in human form, on any other planet?*

There are trillions of Universal societies. Some do have physical forms akin to those of planet Earth. Some are 'close cousins' of yours. But there are always differences. Those who exist in 'almost human form' mostly reside in alternate dimensions. You won't find them in your solar system.

The diversity of existences in the Universe is awe-inspiring. You are truly not alone.

*Please don't leave us. We need you! (Laughter)*

In earth time, we are likely to remain here for the rest of this year. But it is unlikely that this direct channeling will be permitted again. Our energies could do damage to the physical form. You observed how uncomfortable he was at first. We are no longer 'in him'; we are now surrounding his body and using him like a microphone.

*Do we only go into physical and emotional suffering when we move away from the light?*

We are no experts on your race, but we speak from our observation of humanity. ***One of your greatest teaching tools is also your greatest pitfall: the ability to move away from the light.*** When you experience darkness, you understand the magnificence of the light. So, though we know that your society has created this for growth; we cannot fully understand it, because we would not choose it. *We could not* choose it.

*Does your collective have a name?*

We have no name to offer you. We do not work with names or labels. But as this is necessary for the human race, you are welcome to name us anything you like. But the link has already been established. Just think of us, and our energies are with you. However, you will not be able to hold us or channel us; you will only be able to repeatedly touch our energies.

*Do you have anything like karma?*

We have no concept of karma. We are, in fact, studying it on earth. How can we create karma, when we never deviate from the light? However, we have something similar.

You use karma as a tool for growth. We use the assimilation of knowledge and wisdom in the same way. Our quest is to continuously explore, experience and assimilate. We visit different societies, experience and

assimilate their knowledge and wisdom, and move on.

*If we have lived in highly advanced societies in the past, why would we then choose to incarnate into a society in which there is pain and suffering?*

We are clueless; it is not a choice we are capable of making. But we are beginning to acknowledge the magnificence of the choice you have made. We do see benefits in terms of your growth through experience.

When we garner knowledge and wisdom, we do so by temporarily merging with that which we are studying. So we do understand it 'from within'. But we do not 'make it ours'.

Part of our current growth will come from co-existing with certain human beings, or even by temporarily merging with their bodies (naturally, with the permission of the higher soul). By doing so, we will experience their daily trauma and joy. But when we detach, we do not retain any residual energies. We will therefore have known it; but not carry it with us.

You carry the residue of your trauma with you for years; sometimes over lifetimes. This offers you tremendous growth, but the process is painful. It's not a choice we would, or could, make.

Let's give you an earthly parallel. You can understand the joy an explorer feels when he attempts to climb a tall and dangerous mountain. You may not choose to do so; but you can understand the urge a person has to battle insurmountable odds to reach the summit. He will have to brave the cold, undergo severe physical strain, and face the possibility of serious injury or even death; and yet he chooses to do so. We view you like these brave mountaineers. We respect you.

*Can you see our future?*

We can; but we are not permitted to reveal it. As we are beyond time and space, the past, present and the future are all the same to us.

*You are now familiar with our minds. How do you view them? Do they appear*

*to be a mistake of creation? (Laughter)*

Let us attempt to answer this without sounding offensive. (Laughter) To us, the human mind is a complicated maze. It is work-in-progress. It is a very complex structure; one which offers you the opportunity to go completely astray, or completely on-track, at will. It can be a devious trickster or your greatest ally.

It is representative of earth's duality; a concept which utterly fascinates us. We also find the minds of the other kingdoms of earth far more streamlined than those of the human race. But it is an extremely interesting 'jigsaw puzzle'.

Now, before we end, let us share with you a little more about our society.

(Suddenly pointing to group member U.) You recognize us! Yes, you do.

*Yes, I do.*

As we said, we do not 'stay in one space'. We move as a collective, flowing through time, space and dimension. No matter where we go, we interact joyously with all whom we meet. Our entire existence is 'the journey'. We never really halt anywhere. Yes, though from your perspective we may be in earth's vicinity for about a year; from our perspective this is a few seconds.

We are eternal. We have no birth and death like you do. But there comes a time wherein an individuated aspect of our society reaches 'saturation-maturity-point'. At this point, that beingness simply fragments into multiple beings. We are not born; nor do we die; we simply transfer our energies from one form to another. We constantly multiply.

*In earth time, how long would it take you to reach saturation-maturity-point?*

Possibly a 100,000 earth years or more. Yet, from our perspective, it is timeless.

We are non-interfering beings. We only add our assistance or energies to a society when called upon to do so; but we never interfere with or impose

ourselves on any civilization.

You have Master-frequencies; ones whom you call upon for help and guidance. We have none; we are in tune with all energy. To us, it's all the flow.

We just ARE.

(Sohrab shifts energies)

THE SAI GREETES YOU.

Dear friends, you will now receive more and more unusual visitors like these ones. Earth herself is moving into new levels of multi-dimensionality. She will now repeatedly bend time, space and dimension to draw to herself these kinds of visitors and energies.

You have just interacted with a magnificent group of Universal Travellers. We do urge you to open to their energies in the future. Remember, they will not assist you with personal issues or life-choices; they are simply here to help raise your overall consciousness.

The Sai, in his Universal form as the COSMIC ILLUMINATOR, blesses you.

\*\*\*\*\*
